## EWE-REKA LAMB MILK

### Now in Stock

Ewe-reka is the only Lamb Milk made with ewe's milk (ewe milk @ 20% inclusion).

4 oils, safmannan yeast and plant extracts (increased digestibility - competitors have only 2 oils. Plant extracts and Safmannan minimise clostridial bloat and scour).

Ewe milk aroma (tastes like mothers milk).

Easy mix (either warm or cold).

~~

## LEPTAVOID H

Leptavoid H - the UK's leading vaccine for the control of leptospirosis in dairy and beef cattle.

Leptospirosis is endemic in the UK cattle population with around 62% of beef herds and 64% dairy herds testing positive for the disease. Vaccination is the only proven way to control leptospirosis, with Leptavoid H being the only vaccine licensed to protect cattle from both strains of the disease in the UK herd.

Vaccination of cattle should ideally take place prior to turnout and should start when calves are five months old. A vaccination programme protects against infection in clean herds and gives long term control of the disease in infected herds. A course of Leptavoid H (two x 2ml doses, four to six weeks apart) should be administered initially. A booster vaccination should then be given annually each spring thereafter.

## LIQ-IO CONC TEAT DIP

➤ Brand New Generation **9:1 Concentrated** Teat Dip developed to BPR standards.

➤ Uses less percentage of biocide in use than older formulations with much more biocidal power creating a gentler, safer product.

➤ Extremely easy to mix (and no separation) when compared with existing products. Simply fill your empty container half full with water, add the product and top up. No extra mixing needed.

➤ Gives an equivalent skin softening/conditioning effect when compared with typical high emollient RTU formulas.

➤ Fully tested and approved by the Biocidal Products Regulatory Authority.

➤ **Very** economical in use compared to RTU formulas.

**One x 22Lt Drum of  
Liq-Io Conc. Teat Dip,  
which will make up a 200Lt  
container of RTU Teat Dip  
is £110.00 Plus VAT  
Quantity Discount rates  
available for more drums.**

**We are getting Great Reports on this  
product, it is selling extremely well  
for us!**

## I'ANSON QUALITY FEEDS

We are a major stockist of I'Anson Quality Feeds. Based in Masham, North Yorkshire, I'Anson Brothers Ltd is an independent family owned business which has served the farming community for 118 years. They are committed to producing the highest quality feed using only assured raw materials from proven sources, manufactured with the latest technology and using only fixed formulations which have been proven to maximise the potential of your livestock.

We stock a wide range of I'Anson products, suitable for any stage or type of livestock. These include Alfalfa Calf, a premier calf starter coarse ration. Alfalfa Calf is designed to provide a highly palatable coarse ration which stimulates early intake, rumen development and healthy weight gain. Other products stocked include Ruminuts, Calf Early Weaner Pellets, and the Goldenblend Coarse Rations, Calf 18, Lamb 18, Tup Ration and Flakey 253.

If you would like details or prices on any I'Anson products please give us a call!
