FARM-O-SAN MAXCARE/REVIVA

Directly before and during calving, cows do not eat and drink, but they do lose water and electrolytes, and their blood calcium level goes down. This may turn the animal listless, resulting in a reduction of dry matter intake. Farm-O-San Reviva is a highly palatable post calving drink for cows, containing large amounts of calcium and energy. It quickly rehydrates and replenishes mineral loss in the cow.

Administration

Mix 1kg of Farm-O-San Reviva with 20 litres of luke warm water and administer it once, immediately after calving and before free access to drinking water is given.

Features

Farm-O-San Reviva is highly palatable, contains a large amount of calcium and is an easy to digest source of energy and electrolytes.

'REVIVA WILL HELP KEEP HER ON HER FEET'

Great Offer this month on Reviva

ULTRA DRI

Absorbent, Dry Disinfectant Powder **ULTRA DRI** acts in the following ways

- ❖ It acts as a very powerful drying agent on the bedding and in the cubicles, stable or pen.
- ❖ It contains a broad spectrum disinfectant
- ❖ It quickly reduces ammonia and other noxious gases.
- ❖ It acts very quickly, killing most pathogens within 5 minutes.
- ❖ It remains active for up to a week after application.
- ❖ It even works in contact with the bedding and waste.

Organisms must be killed in order to reduce disease.

Bacteria Viruses

Funghi

When **ULTRA DRI** comes into contact with these pathogens in the environment, it kills them rapidly and continues working from day to day.

Available in 25kg Bags

HYDRAMIX LIME

Hydramix is a cost effective 100% natural mixed Lime product for use in cow cubicles, poultry and stock sheds, to lime small paddocks and for horticultural applications.

Hyramix has low dust levels and won't burn so is safe to use as a single bedding material. It can be used on all types of cattle housing surfaces, mixed with sawdust, shavings or straw for loose housing, or applied to sheep and poultry housing.

Containing carbonates and oxides of lime, Hydramix significantly improves hygiene which leads to healthier livestock therefore increased yields and profitability.

It effectively controls eColi and aids the prevention of mastitis and digital dermatitis and is a highly absorbent free flowing powder, which is an economical drying agent, thereby improving the environment for both livestock and stockmen.

Packaged in convenient 25kg damp proof polythene bags

1 - 9 Bags	£8.00 per bag
10 - 39 Bags	£6.50 per bag
40+ Bags (Delivered Direct)	£5.00 per bag

Plus VAT
