### DIGICUR ADVANCED

Highly concentrated footbath for cattle and sheep containing a blend of glutaraldehyde with a unique copper and zinc complex for effective and long lasting action.

- Triple action effect from a blend of glutaraldehyde with Copper and Zinc
- Rapid acting hoof cleaning and disinfection
- High levels of surfactants for penetration and long lasting effect
- Free from formalin, antibiotics and QACs
- Use at 2% dilution for low cost per use

### EWE-REKA

**Lamb milk replacer made with ewe milk**

- Sourced from ewes milk (min. 20% inclusion)
- Made with 4 vegetables oils and plant extracts to help minimise clostridial bloat and scour.
- Ewe milk aroma.
- Fully instant formula.

**\*\*Unlike cow whey lamb milk replacer, Ewe-reka contains antibodies to specific sheep diseases from ewe whey.**

#### Benefits of Ewe-reka

- Tastes like ewe milk - encourages drinking and stronger drinking reflex.
- Naturally derived antibodies - healthier stronger lambs.
- Ewe-reka can be fed warm or cold - easy mixed.
- Reduced morbidity and mortality - more lambs for replacement ewes and more to sell.

### ORDERS BY TEXT

If you would like to text orders to us, any time of the day, you can do so to the numbers below -

- Coars Ltd (Garstang) 07395 322151
- Coars (NE) Ltd (Leeming Bar) 07842 443784

### EVANS CLEANSAN

Detergent for cluster flush and teat brush systems. Formulated to clean clusters between each cow and effectively clean cows' teats when used through teat brush systems.

- Formulated without peracetic acid; less corrosion.
- QAC-free formulation.
- Highly concentrated - 25l of super-concentrate makes 200l of concentrate.
- Neutral pH - mild on cow's teats.
- Added sequestrants - effective in hard water.
- Low foaming - no issues with foam residue
- Most effective when used in conjunction with a suitable disinfectant, such as Evans Peradox.

### CALF SCOUR TEST KIT

An ideal aid in the rapid detection of rotavirus, coronavirus, E.coli and cryptosporidium parvum in calves.

#### **Product Benefits:**

- No need to wait for lab results, just test and go in 10 minutes!
- Detects E.coli F5 (ETEC) (K99), rotavirus type A, coronavirus (BCoV) and cryptosporidium parvum.
- Simple visual confirmation.
- Highly sensitive and reliable.

**A single calf scour test kit is £15.00 +VAT**
