### **COARLIKS**

#### **GARLIC MINERAL BUCKETS**

The peculiar penetrating odour of garlic is due to high Sulphur compounds, which, when expelled through the skin in natural body secretions, produce an invisible barrier which flies and other biting insects find repellent. Though still present around the stock, they seldom land on the skin, significantly reducing the level of irritation and restlessness.

**The Coarliks Garlic Bucket is a top quality General Purpose Mineral tub with a very high inclusion of Garlic added to it.**

They are especially beneficial for suckler cows, dry cows and fattening cattle. A 28-day meat and a 7-day milk withdrawal should be allowed.

**This month only we will reduce the price of Garlic Mineral Buckets (25kg) by £1 each and if you purchase 12 Tubs you will receive another one Free of Charge!**

### **COXICUR**

Broad spectrum disinfectant, effective against viruses, bacteria, moulds and yeast.

- DEFRA approved terminal disinfectant

### **COARS LACTO HEX**

Ready to use lactic acid, chlorhexidine and peppermint based skin conditioning teat dip, spray and foam for outstanding teat hygiene and udder health.

- Chlorhexidine provides rapid acting teat cleaning and disinfection
- High levels of lactic acid to promote healthy skin regeneration leaving teats feeling soft and supple.
- High levels of glycerol which softens the skin to reduce cracks and crevices where bacteria can multiply
- **Contains menthol and peppermint to soothe inflammation and discourage flies**

We are getting some great reports on Lacto Hex with users especially liking the peppermint that discourages flies.
