### GREAT YORKSHIRE SHOW

We will have a stand at the Great Yorkshire Show  
(8<sup>th</sup>-11<sup>th</sup> July)

Our Stand number is: 752

We will also have a stand at:  
Great Ecclestone Show on the  
12<sup>th</sup>-13<sup>th</sup> July

One of the country's best local shows!  
Come and visit us and take advantage of our  
Special Show Offers.

### BOVIKALC

For reduction of the risk of milk fever:

- First bolus at the sign of parturition
- Second bolus immediately after calving
- If necessary give one or two additional boluses at 12-15 hour intervals

For supplementation following calcium injection:

- 1<sup>st</sup> bolus 2-3 hours after calcium injection
- 2<sup>nd</sup> bolus 12-15 hours later

#### Key Features

43g Calcium per bolus

71% Calcium Chloride

- Rapid action
- Promotes mobilisation of bone calcium stores for ongoing calcium demands

29% Calcium Sulphate

- Sustained release

Blood calcium raised within one hour and maintained for 24 hours

Xanthum gum coating for ease of swallowing and durability

Very competitively priced and  
quantity discounts available!

£600

19.7 ton Bulk Bin from Collinsons, 2009, 60 degree  
cone, excellent condition £3,500

Tel: 07765 878689 - Vicky

### RODENTICIDE PURCHASES FROM JANUARY 2026

- Take action this year if you plan to purchase and use professional use rodenticides from 2026 onwards
- There are important changes in proof of competence requirements for purchasers from 1<sup>st</sup> January 2026

From 2026, existing membership in Farm Assurance Schemes alone will not qualify as proof of competence for rodenticide purchase. Farmers will need to show proof of CRRU-approved training within the last 5 years, or, if certified over five years ago, join and fulfil membership criteria for a CRRU UK approved Continuing Professional Development (CPD) scheme in 2025.

#### What training certification do you need?

Either

Proof of certification to a CRRU UK approved training course **within the past 5 years**

Or

Proof of certification to a CRRU UK approved training course **more than 5 years ago** and current membership of a CRRU UK approved Continuing Professional Development (CPD) scheme

### PARLOUR FANS

The Barn Cooler Parlour Fan is an ideal solution for improving air quality, reducing heat and insect stress, and promoting overall animal health in your barn. It is engineered to provide much better airflow than traditional funnel or basket fans. When placed according to the recommended pattern, this fan promotes efficient, thorough air circulation throughout the dairy parlour to move flies and an improved working environment.

- More than twice the air flow and a wider air stream than funnel or basket fans at 14,445m<sup>3</sup>/hr
- Balanced blades prevent noise and vibration
- Maintenance free, heavy duty ball bearing motor, 230v AC run from a 13amp supply
- The EF02 mist kit can be used to deliver a fine water spray that, combined with the fan's airflow, creates a gentle and refreshing cooling mist.
