MATRIX ANIMAL HEALTH SUPPORTING RESPIRATORY HEALTH IN CALVES

Respiratory health challenges are common in young calves, particularly during periods of stress such as housing, weaning, or environmental change. Targeted nutritional support can assist pulmonary function, promote mucosal stability, and help calves maintain feed intake and recovery. The Easy Breathe range offers non-antibiotic support to help manage respiratory pressure and improve resilience during high-risk periods.

- **Easy Breathe Bolus**

An oral bolus to support a healthy respiratory system in young calves.

- **Easy Breathe Liquid**

Mix with milk to support a healthy respiratory system.

- **Easy Breathe Powder**

Add to milk or dust over meal to support a healthy respiratory system in young calves.

DIGICUR ADVANCED

Highly concentrated footbath for cattle and sheep containing a blend of glutaraldehyde with a unique copper and zinc complex for effective and long lasting action.

- Triple action effect from a blend of glutaraldehyde with Copper and Zinc
- Rapid acting hoof cleaning and disinfection
- High levels of surfactants for penetration and long lasting effect
- Free from formalin, antibiotics and QACs
- Use at 2% dilution for low cost per use

CALF TUOY PLAY BALL

Improve your calf's well-being with a play ball. Calves are naturally curious and are motivated to explore their environment. Suspending the ball from the ceiling into the calf pens allows the calves to bunt it. This can reduce stress and boredom, promoting healthy social interaction with other calves. The Calf Tuoy comes with a quick link and inflation adaptor.

SECURE WINDBREAKS

RAPID FIT WEATHER PROTECTION FOR LIVESTOCK BUILDINGS

Rain, wind or hail...Secure Windbreaks have got you covered.

Secure Windbreaks can be used for permanent or temporary weather protection. Ideal for livestock sheds, storage barns, equestrian centres, indoor arenas and supporting facilities.
