COARLIKS FERTILITY PLUS

A very high specification mineral bucket formulated for pre-calving with high phosphorus and extra-high trace elements and vitamins to support fertility in dairy and suckler cows. Contains copper for optimal reproductive health.

Key Benefits:

- ✓ Good phosphorus level to support fertility and reproductive efficiency.
- ✓ Zinc for healthy skin, hooves, and reproductive function.
- ✓ Manganese to aid conception and embryo development - low levels may lead to poor conception and irregular cycles.

Recommended Use:

Pre - calving

EWE-REKA

Lamb milk replacer made with ewe milk

- Sourced from ewes milk (min. 20% inclusion)
- Made with 4 vegetable oils and plant extracts to help minimise clostridial bloat and scour.
- Ewe milk aroma.
- Fully instant formula.

****Unlike cow whey lamb milk replacer, Ewe-reka contains antibodies to specific sheep diseases from ewe whey.**

Benefits of Ewe-reka:

- Tastes like ewe milk - encourages drinking and stronger drinking reflex.
- Naturally derived antibodies - healthier stronger lambs.
- Ewe-reka can be fed warm or cold - easy mixed.
- Reduced morbidity and mortality - more lambs for replacement ewes and more to sell.

HIMALAYAN LUMP ROCK SALT

DELAVAL TITAN (SPRAYABLE BARRIER)

TEAT DIP

Give your cows the ultimate barrier protection between milking's with Titan sprayable barrier teat dip.

Titan represents a significant advancement in udder health management. Its innovative film-forming technology creates a barrier film on the teats, helping to protect against environmental pathogens like *S.uberis* and *E.coli* - prevalent causes of mastitis. Delivered in an easy-to-use spray format, this advanced barrier offers longer-lasting physical protection helping to maintain optimal udder health and reduce the risk of contamination.

- Long lasting barrier
- Quick drying formula
- Contains lactic acid and salicylic acid for dual biocidal efficacy
- Protects cows teats in-between milkings
