PASSION SUPREME OXYGEN BARRIER SILAGE FILM

Passion Supreme is a one piece 80 micron film that provides oxygen barrier and is UV stable. It has been specifically engineered and proven to protect forage and grains from oxygen - 1000 times more than traditional plastic covers.

It is strong, stretchy, flexible and more clingy than traditional covers, easy to use and cost effective. Applied immediately after harvesting and packing, Passion Supreme barrier film blocks oxygen from penetrating and is UN stable, allowing high quality fermentation of the feed and reducing surface spoilage of the pile or bunker.

KETO CARE

A dietic complementary feed for dairy cows for the reduction of the risk of ketosis.

- Provides cows with an immediately available source of energy
- Energy precursors to fuel milk production
- Vitamin B12 and Vitamin E for effective energy metabolism
- Niacin and choline for liver support
- Feed in the first 6 weeks of lactation
- Administer by oral drenching, top dressing of feed or incorporation into TMR
- Available in 25lt, 200lt, and 1000lts

ROTO CORONA SYRINGE

A complementary feed that helps support the newborn calf's natural defences against the challenges of life.

Roto Corona Plus provides newborn and transported calves with highly concentrated digestible energy and bovine proteins to help get them off to a great start. Ideal for administering at times of stress such as transport. Administering one Roto Corona plus syringe soon after birth can help support natural defences to the challenges of life.

NATIONAL 3 PEAKS - 8TH MAY

Not long now until our Cure Parkinson's fundraiser.

Thank you for all your support!
