COARLIKS

GARLIC MINERAL BUCKETS

The peculiar penetrating odour of garlic is due to high Sulphur compounds, which, when expelled through the skin in natural body secretions, produce an invisible barrier which flies and other biting insects find repellent. Though still present around the stock, they seldom land on the skin, significantly reducing the level of irritations and restlessness.

The Coarliks Garlic Bucket is a top quality General Purpose Mineral tub with a very high inclusion of Garlic added to it.

They are especially beneficial for suckler cows, dry cows and fattening cattle. A 28 day meat and a 7 day milk withdrawal should be allowed.

Buy 12 tubs and you will receive another one Free of Charge!

BOVIKALC

For reduction of the risk of milk fever:

- First bolus at the sign of parturition
- Second bolus immediately after calving
- If necessary give one or two additional boluses at 12-15 hour intervals

For supplementation following calcium injection:

- 1st bolus 2-3 hours after calcium injection
- 2nd bolus 12-15 hours later

Key Features

43g Calcium per bolus

71% Calcium Chloride

- Rapid action
- Promotes mobilisation of bone calcium stores for ongoing calcium demands

29% Calcium Sulphate

- Sustained release

Blood calcium raised within one hour and maintained for 24 hours

Xanthum gum coating for ease of swallowing and durability

Very competitively priced and quantity discounts available!

TURBULATOR PARLOUR FAN

The Turbulator heavy duty plastic 500mm recirculation fan provides constant airflow up to 25mt and is suitable for all year round ventilation. Designed specifically for long service life in poultry, dairy and horticulture applications, the Turbulator recirculation fan removes condensation and provides evenness of temperature and humidity. Comes with lifting hooks but no cable, installation by a qualified electrician is recommended.

EVANS CLEANSAN

A detergent for cluster flush and teat brush systems

Effectively cleans clusters between each cow or when used through teat brush systems.

- Highly effective at cleaning teats through teat brush systems
- Formulated without peracetic acid, ideal for cluster flush systems that are at risk of corrosion
- Suitable for use in conjunction with added disinfectants in teat brush systems
- A 25lt drum makes up 200lt of concentrated solution
