COARS MILKSTONE PLUS

A concentrated liquid, specially formulated for the cleaning and descaling of all types of bulk tanks. Ideal for warm/cold, afternoon/night parlour wash and periodic milkstone removal.

- Surfactant assisted acid.
- Suitable for cleaning and descaling all types of bulk tanks, robotic parlours and other equipment in dairy milking parlours.
- Very versatile, reduces the number of products needed in the dairy.
- May be used hot or cold.
- Effective in hard or soft water – one product regardless of water supply.
- May be used in alternating alkali-acid wash programmes.

Available in 25lt, 200lt and 1000lt

JOB VACANCY

We are looking to recruit a **Dairy Engineer** to join our team at Garstang.

The full time permanent position will involve the service, repair, and installation of Milking Parlours and associated equipment. An engineering background is preferred but not essential as training will be provided. Applications are invited from candidates who are well motivated, competent in practical skills, have the right "hands on" attitude, and a willingness to learn.

This is an excellent opportunity to become part of a highly successful, established, family run business that has an outstanding reputation within the Agricultural industry. To apply please complete an application form that can be found on our website www.coars.co.uk

RODENTICIDE PURCHASES

If you plan to purchase and use professional rodenticides you now need to show us proof of CRRU UK approved training.

To sign up for online training and certification you can visit:-

MICRON FLUKE AND WORM TESTING SERVICE

We are able to offer at our Garstang store a fluke and worm testing service. The Micron kit allows us to test faecal samples for fluke and worms, helping us to accurately identify the condition and prescribe the most suitable wormer to treat it.

- Rapid results
- Small sample of droppings required
- Reduces hours of unnecessary dosing
- Testing enables targeted treatment
- Less money spent on non-essential worming
- Reduces the rate of wormer resistance
- Available for cattle, sheep and horses

A micron test is £19 plus VAT and the testing service is normally available Tuesday – Friday. The faeces sample should be as fresh as possible, but it will be okay for us to analyse samples up to about 36 hours old. Following the test we will email or WhatsApp you an in depth report along with brief advisory recommendation. The results speak for themselves. Testing for fluke and worms with our Micron kit just makes sense!

REHYDION GEL

Supports calves and lambs during scouring, and can also be used to proactively support animals that are potentially at risk of stress or infection.

- Rehydion is an oral rehydration therapy gel that provides sufficient essential electrolytes to correct acidosis.
- **Allows continued milk feeding** (when given at the recommended levels), as it does not disturb milk clot formation or delay abomasal emptying.
- Can be mixed (and stays mixed) with milk or water, using the dosing cap, or it can be administered directly using a dosing pump / syringe.

SECOND HAND MARKET

- Dairyspares portable milker c/w cluster & bucket, used once £1100 + VAT
- 3200ltr DX bulk tank complete 1PH
- Delaval DVP900 vacuum pump assy complete 3PH
