LIVER BOOSTER

CONTRIBUTES TO HEALTHY LIVER FUNCTION

Characteristics:

Liver booster is particularly intended for dairy cows:

- Too fat before or at calving
- With high production potential
- With a loss of appetite
- With a lactation rank ≥ 2

One dose consists of 2 boluses.

Benefits:

- Supports lactation start-up and improves milk production
- Supports liver functions and energy metabolism
- Limits the impact of oxidative stress
- Supports the functions of maintenance, growth, production and reproduction
- Ensures proper liver function

Distribute orally a dose of 2 boluses LIVER BOOSTER 10 to 15 days before calving, or just after. Repeat the dose if necessary.

The nutritional components of the boluses are fully released in less than 24 hours after application.

The bolus should preferable be administered using a bolus pump by a vet or other competent person.

EVANS MASODINE CONCENTRATE

Premium quality concentrated Iodine teat dip and spray

- Concentrated 1:3 iodophor teat dip / spray
- UK authorised veterinary medicine
- Reduces the risk of infection by leaving an antiseptic film of Iodine adhering to teats which have been treated by dipping or spraying
- Contains both Glycerol and Sorbitol to help keep teats soft and supple
- Can be used as an udder wash and cluster dip at 1:500 dilution
- **Dilute at 1:7 for alternative economical usage**

A 25Lt drum can make 200Lt of RTU teat dip and is priced at £145.00 + VAT

WESTMORLAND COUNTY SHOW – 9TH AND 10TH SEPTEMBER

Westmorland county show is a great day out, one of the UK's favourite shows and enjoyed by almost 40,000 visitors every year.

HODDER VALLEY SHOW – 12TH SEPTEMBER

The Hodder valley show is a superb traditional agricultural and horticultural show which always draws a great crowd.

We will be in attendance at both these local shows – call and see us!

COARLIKS DRY COW PLUS

A very high-specification mineral bucket designed to help prevent milk fever, ease calving, and support strong early lactation performance.

Key Benefits:

- **Copper:** Vital for overall health and fertility – Boosts immune health to help reduce the risk of infections around calving.
- **Vitamin E:** Acts as a powerful antioxidant, helping protect cells from oxidative stress and boosting immune function.
- **Zinc:** Supports skin and hoof health, aids wound healing, and is vital for proper immune system and reproductive health.
- **Vitamin B12:** Essential for energy metabolism and red blood cell formation, helping maintain vitality and supporting the increased energy demands of late pregnancy and early lactation.

Recommended Use: From drying off period
